

We are looking for mentors!

Support our SBE community

As a mentor, you will support our new bachelor students (freshmen) feeling at home at our school. The role of the mentor is of great importance as you will be the first contact person for freshmen arriving in Maastricht. Unfamiliar with the city, the culture and life at our University freshmen will make use of your experience and network to familiarize themselves with their new environment.

You as a mentor can make the difference to them!

Your role as a mentor consists out of two parts: 1) you serve as a mentor during the BSc introduction days (26-27 August), 2) you will be a mentor in SBE's first year community project (whole academic year). It is very important to us you fulfill both roles. This means application only makes sense if you are available for both responsibilities.

What do we ask?

- *You coordinate a WhatsApp group for 30 freshmen for the whole academic year*
- *You host at least one social activity during the first semester (Sept – Jan) for your community*
- *Together with a Student and Career Counsellor, you will facilitate a Q&A in order to tackle common questions freshmen have*
- *You are available during the introduction week (25-26 of August) to serve as mentor*
- *You represent SBE!*

What do we offer?

- *We compensate 12 hours of work for being a mentor during the community project (whole academic year)*
- *We compensate 11 hours of work for the BSc introduction days (25-26 August) (two days of 5 hours, including one hour of briefing)*
- *We train you to be well prepared for your role*
- *A LinkedIn recommendation at the end of the year by our bachelor director*
- *A workshop from a SBE professor at the end of the year to thank you for your input*
- *The Community coordinator serves as your backup in case of questions*
- *A rewarding experience!*

Deadline application?

- April 26

How do you apply?

- *Pitch yourself in a 1 minute video and tell us who you are and what your contribution as a mentor will be. You can apply and upload your video at <https://scope-maastricht.nl/>*

Looking forward to your application!
